Jeff, Angie,

I received a call from Shannon Dickson of WA DOE 360-927-2237 concerning the abandonment of about 10-12 5 gallon containers of an unknown material at Skyline Electric and Manufacturing in Seattle. Shannon did not have many details concerning the condition of the containers, but did take note that they were located at the northeast corner of the property.

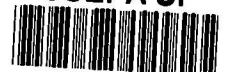

I called the facility to find out they closed at 3 today. Shannon pass along a contact for the facility...John. Sheleahl 206-682-4422 who reported the situation to Shannon. It may be worth taking a quick look to determine the condition of the containers this evening. If its not a burning emergency, I would suggest dealing with them tomorrow.

That is all the information I have at this time.
